

We are moving

We are proud to announce that we will be relocating our San Diego Corporate Headquarters from our current location on Siempre Viva Road to a new location at the Landmark at Otay business park. This new expansion into the Landmark at Otay business park will allow us to consolidate operations with our current warehouse at this same business park.

We are confident that the move into our new Corporate Headquarters will allow us to accommodate our clients' needs based on the growth being projected as a result of recent changes in the global supply chain. With Near-Shoring, the boom in E-commerce, and organic growth amongst our clients, we are very excited that this expansion will allow us to grow with our industry while continuing to provide quality services to our clients

The new building is currently under construction and our goal is to take occupancy on October 1st with a full 60 days to transition over clients by our December 1st go live date.

Rest assured that our transition teams will be in contact with you to assist in managing this change, and we are open to making any special accommodations needed to ensure the move will not impact your business.

Thank you in advance for your understanding and cooperation, and for the trust that you have always placed in us. We know at the end of this transition we will be better equipped to serve all of your needs now and into the future.

Sincerely,
Eduardo "Lalo" Acosta
